## Wireless Positioning Unit “EPU-200” Series Model Change Notice

Dear Valued Customer,

We hope you are doing well and appreciate your constant business support of NBK.

A model change for the Wireless Positioning Unit “EPU-200” series will occur as follows.

The backwards compatible model will be the "EPU-220" series (scheduled for release on June 29, 2021).

There will be no change in shape, dimensions, or performance as a result of this model change.

Customers who have been using the “EPU-200” series can continue using it for the same equipment designs. With this model change, the terminating resistor, which used to need to be installed externally when wiring, is now built into the unit, allowing it to be changed with software for greater customer convenience.

Thank you for your cooperation and understanding.

[Discontinued Products]  
EPU-200-W5-R60

[Successor Products]  
EPU-220-A-BL

\* The housing will not change. Discontinued products and their successors can be distinguished by the part number listed on the nameplate on the side of the unit.

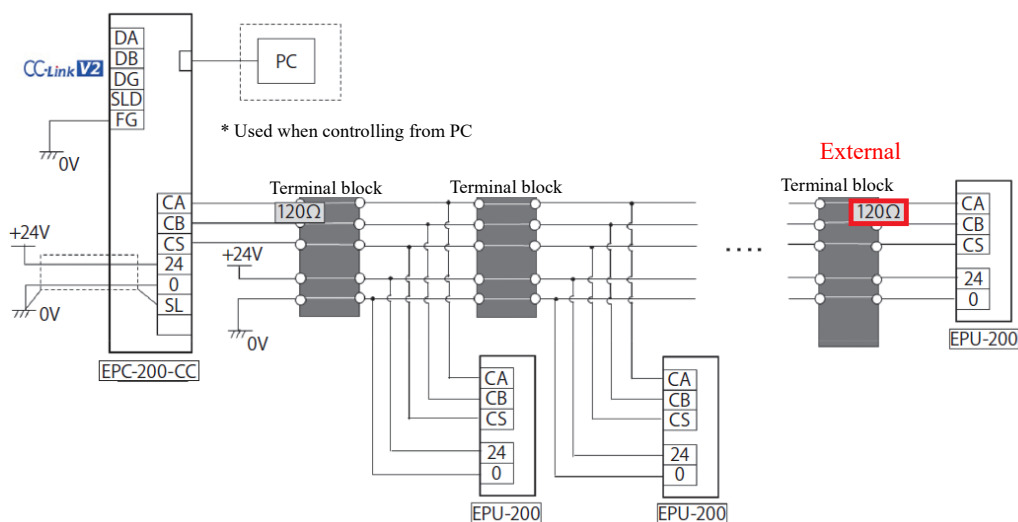

## [Information About Changes]

- Discontinued Products and Successor Products

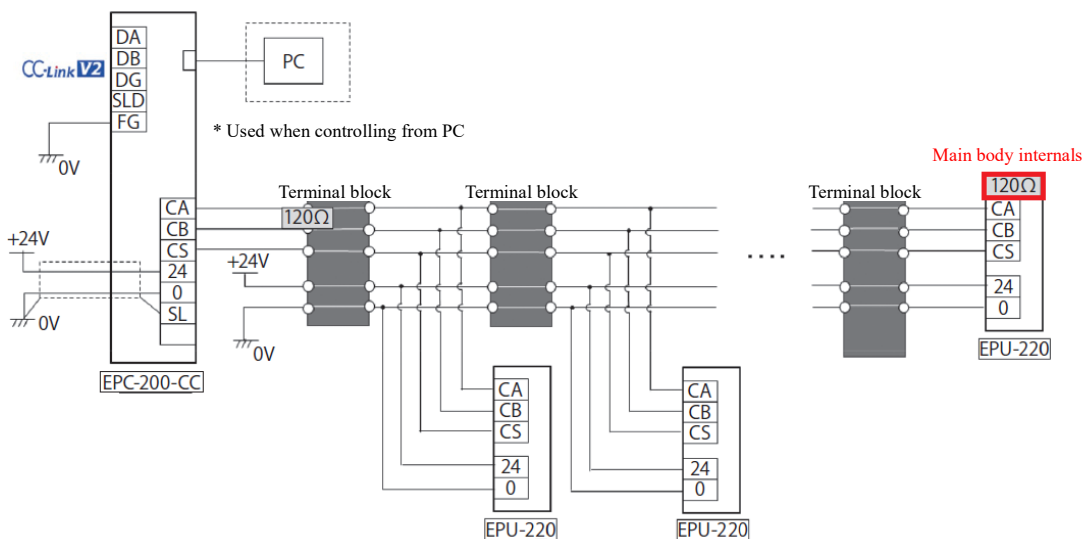

Discontinued Products	Successor Products
EPU-200-W5-R60	EPU-220-A-BL

The RS-485 communication line terminating resistor ( $120\Omega$ ) is now built into the unit instead of being external, and the settings can be changed as desired.

- Existing wiring when using “EPU-200”

- Wiring when using “EPU-220”

## [Change Effective Period]

The “EPU-200” series will be discontinued as soon as stock runs out, at that time we will switch to the successor “EPU-220” series.
