

SFSS-ALK Flanged Hex Socket Head Bolts with Nylon Patch

Vibration resistant treatment Easy operation SUS Stainless steel

Material/Finish

	SFSS-ALK
Main Body	SUSXM7 (Equivalent to SUS304)
Nylon Patch	Nylon 11
Strength Class	A2 - 70

- Because the bearing surface is larger due to the head part flange, the pressure on the fastened material is dispersed compared to normal hex socket head cap screws, making bearing surfaces less likely to sink. Also, the bearing surface can be ensured even with large drilled hole diameters.
- Washer mounting work is not required, reducing the parts needed.
- Washerless design makes it ideal for automated screw fastening by robots.
- The friction of the nylon adhered to the thread suppresses the return rotation of the thread.
- Even if the tightening force is lost, the return rotation is suppressed, preventing the screws from falling off.
- The heat resistant temperature of the nylon patch is 120°C.
- Application

Screw return and fallout prevented
