

SUS Stainless steel

- In combination with the dedicated holding pin **NQTS-HP**, jigs can be easily mounted and removed without tools.
- Just rotate the knob 90°to clamp and unclamp: ideal for repetitive work.
- The knob is reverse-tapered to a hand-friendly round shape, with laser engraving on the main body enabling corrosion resistance to be retained.
- The knob projection and laser engraving make the clamping status clear at a glance.
- The knob operation part has passed 50,000 operation tests. With excellent endurance, it reduces part replacement frequency.
- Two hex socket head cap screws for mounting are provided.
- For mounting to plates from 3mm to less than 6mm, use the dedicated spacer **NQTS-SPCR**.

Unit:mm

Part Number 1	-		La		La	D	M (Coarse)		Lf E l	_		Applicable Plate Th	ickness	Repeated	Clamping Force *1	Mass (g)

*1: Clamping force is the maximum allowable load retaining the mounting plate clearance within 0.1mm against tensile load.

∅ RoHS

• Usage Example In combination with dedicated holding pin **NQTS-HP**, etc.

• Related Products

Dedicated holding pin **NQTS-HP** is available.

Dedicated spacer **NQTS-SPCR** is available.

Mounting

The LOCK display is laser-engraved on the top surface of the main body. Set the LOCK display and mounting hole position with attention to workability.

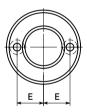

When the plate thickness is from 3mm to less than 6mm, refer to NQTS-SPCR mounting.

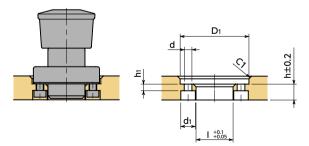

Part Number	Applicable Plate Thickness	I	h	E	d	d1	h ₁
NQTS-6-PH-BK	6	14	6	10	2.9	5.5	2.5
NQTS-8-PH-BK	6	18	6	13	3.4	6.5	2.5

								Unit:mm
Part Number	Applicable Plate Thickness	1	D ₁	h	E	d	d1	h ₁
NQTS-6-PH-BK	6~10	14	26	6	10	2.9	5.5	2.5
NQTS-8-PH-BK	6~14	18	35	6	13	3.4	6.5	2.5

• Pitch Precision Between Holes

The pitch tolerance of the **NQTS-PH** mounting plate and the cam base mounting plate should be $\pm 0.1 \text{mm}$ or below.

• Repeated Positioning Accuracy

Repeated positioning accuracy is ± 0.25 mm. When even higher-precision positioning is required, prepare a positioning pin suited to the application.
