

SRTSQ-TZB Hexalobular Socket Pan Head Machine Screws (with Pin) with Washer

Tamper Resistance Easy operation

● Material/Finish

	SRTSQ-TZB	RoHS
Screw Body	Steel Trivalent Chromate Treatment	
Screw Body Strength Class	4.8 Equivalent	
Plain Washer	Steel Trivalent Chromate Treatment	
Spring Washer	Steel Trivalent Chromate Treatment	

- Pan head machine screws with captive washers, with a pin at the center of the hexalobular socket*1.
- Former JIS-standard plain washers and spring washers are integrated into the screws, preventing concerns about fallout issues. (Washer abbreviation: I=3)
- For screws with captive washers, see “What are screws with captive washers (SEMS screws)?” .
- When using a washer in spot facing, workability is improved because the bolt and washer can be mounted and removed at the same time.
- This prevents mounting and removing with regular tools.
- Install and remove with **SRX** Dedicated Wrench or **SRXB** Dedicated Bit and **SRD** Dedicated Magnetic Screwdriver together.

*1: The hexalobular shape is prescribed by JIS B 1015: 2008(ISO 10664: 2005)"Hexalobular internal driving feature for bolts and screws".

● Application

Equipment/devices disassembly/tampering prevention

Theft prevention for outdoor facilities
